

27 Property

The majority of the proposed upgrade to Port Wakefield Road will be accommodated within the existing road reserve; however, some portions of land will need to be acquired from private owners. The property acquisition process will be the same as that described in Part D, Section 12.

Prior to construction, property owners directly affected by acquisition would discuss compensation, fencing, access arrangements and any other requirements with DTEI to reach an agreement about the timing and extent of works to be carried out.
